- 1) Greyed out until JList has a user selected
- 2) On Click,
 1. Deletes the selected user, updates JList

- 1) Greyed out until JTextField is not empty
- 2) On Click,
 1. if JTextField contains a User Id that does not exist, then add user and clear JTextField
 2. Otherwise show the User Exists error JLabel

On start, the middle and right panes are hidden.

Once an album is selected, the pictures associated with it are populated into the middle pane, and the middle pane is revealed. Once a picture is selected, the right pane is populated and displayed.

When a different album is selected, the rightmost, picture details pane is hidden until another picture is selected
